[INTRODUCTION]

INTRO

Developing this Software has been a great challenge. We wanted to make a very simple to use tool that would help others create upon any surface using their Pictures, Videos or any type of Media. There are great tools that have been made that serve this purpose; the problem is they are too expensive and very hard to understand. We have built an affordable tool that anyone can use since its very user friendly, fast and reliable.

We hope you can take this opportunity and become a professional using our software's. Show your kids, friends and family how simple it can be to create like any graphic artist does. We will continue to develop future versions or updates of this software to include more exciting features for you to use, so stay connected with our web page:

www.edunexion.com

[COMPUTER SPECIFICATIONS]

You can use with a minimum memory of 2 GB Ram and a minimum of 40 Gigabytes of hard drive to store your pictures, videos and general music files.

We recommend a minimum Memory of **4 GB minimum** and a Hard Drive of 60 GB to assure you have the necessary resources to run all programs on your computer along with our software's.

- OPERATING SYSTEMS: [**Windows 10, Windows 11**]
- FRAMEWORK / PROGRAMS [**.NET 4.0 Framework or higher, Adobe Reader 11 / Acrobat Reader or higher versions**]
- COMPUTER MEMORY

Minimum Recommended System Requirements:

<u>PICTURES SIZES</u>	<u>MINIMUM RECOMMENDED MEMORY</u>	<u>CPU PROCESSOR</u>	<u>MONITOR RESOLUTION</u>
320 x 240	4 GB	500 MHz	1024 x 768
640 x 480	4 GB – 8 GB	3.1 MHz	1280 x 1024
1280 x 720 [HD]	8 GB – 16 GB	3.1 MHz or Higher	1920 x 1080

- **VERSION**
- Each time you load the software, it will advise you if there is an update available. You can choose to install it or continue to use your current version.

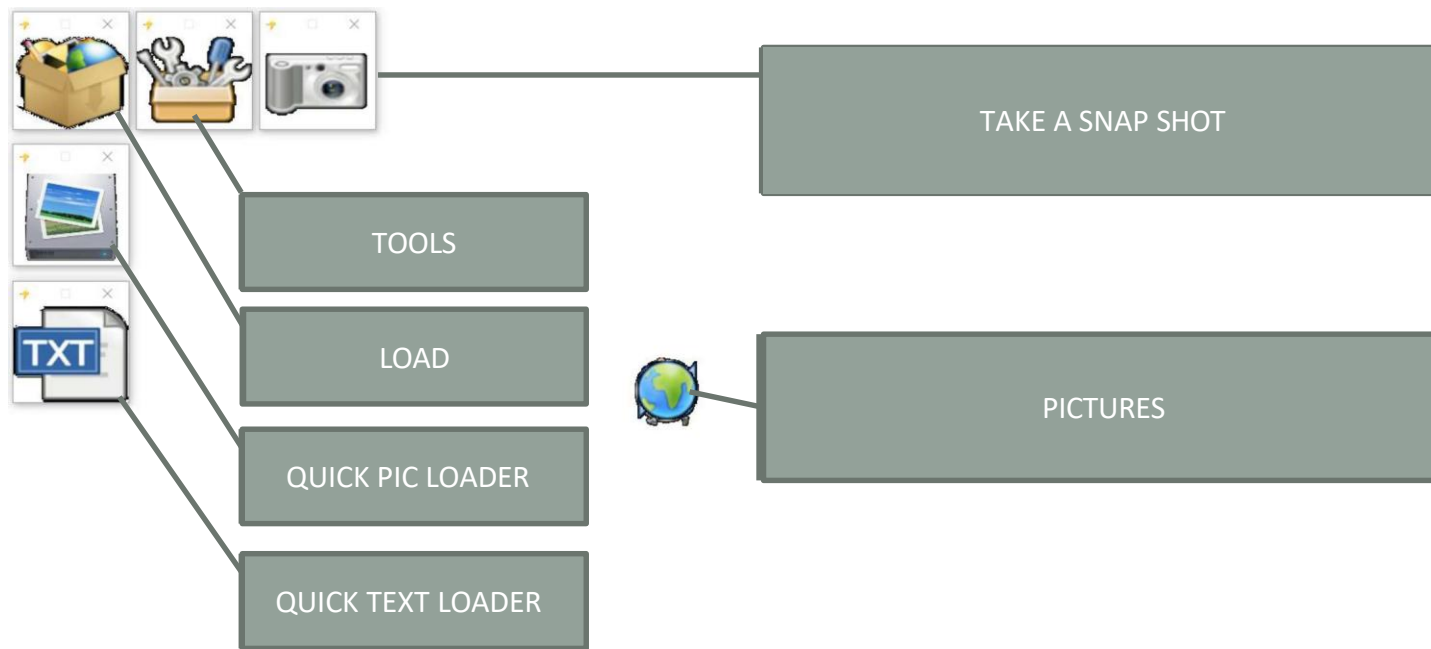

[MAIN SCREEN OPTIONS]

THE SOFTWARE IS READY

[MENU]

MENU

- 5 basic menu options and 5 Pictures (Pics) to start your creation.

MESSAGES

- Messages – important messages or tips.

TIPS

- To Open the Menu on Pics or Texts – (RIGHT CLICK ON YOUR MOUSE TO OPEN MENU)

[PICTURES MENU]

PICTURES MENU (RIGHT CLICK ON YOUR MOUSE TO OPEN MENU)

- Borders – Adds a border or lets you resize your Image.
- View or Hide – To view or hide the borders.
- Width Size – Changes the size of the border. (Borders default size is 5.)

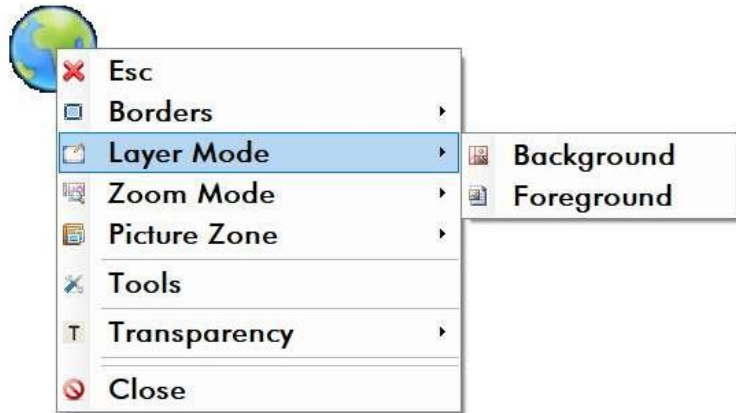

BORDERS (Color & Resizing)

- Borders Color – You can change the color of the border by double clicking on the top side.

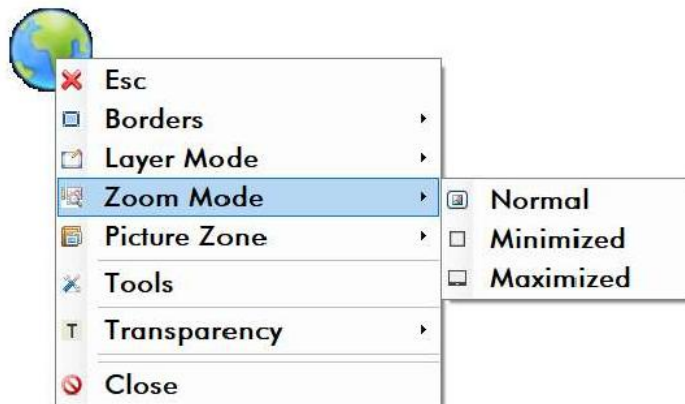

Resize Frame.
Cambiar el Tamaño del Marco.

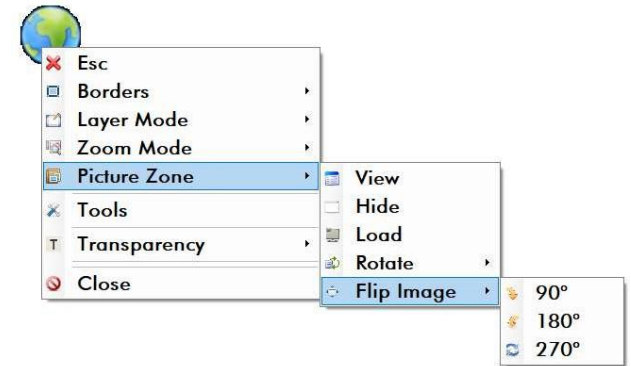

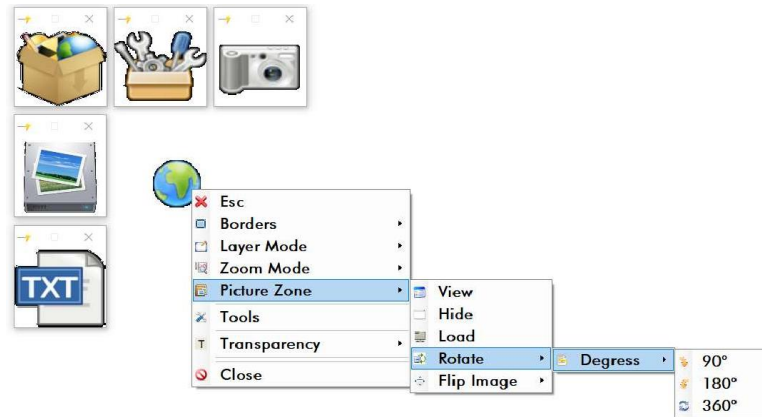

📁 **Resize Pics** — You can change the size of your Image by pressing on the bottom or right side of borders. Press and hold down the border using your mouse or fingers on a touch screen.

📁 **Layer Mode** – To individually change the foreground or background mode of your Pic. This is similar to Send to front or send to back.

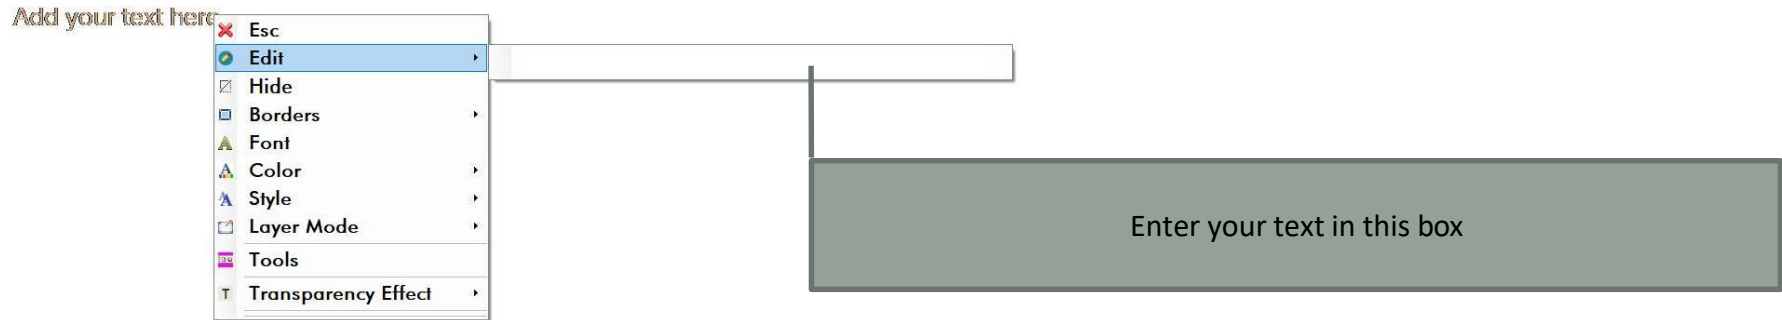

📁 **Zoom Mode** – To individually zoom your Pic.

📁 **Picture Zone** – You can manually load Images or Gifs to the Pics. (This is the alternative to drag & drop)

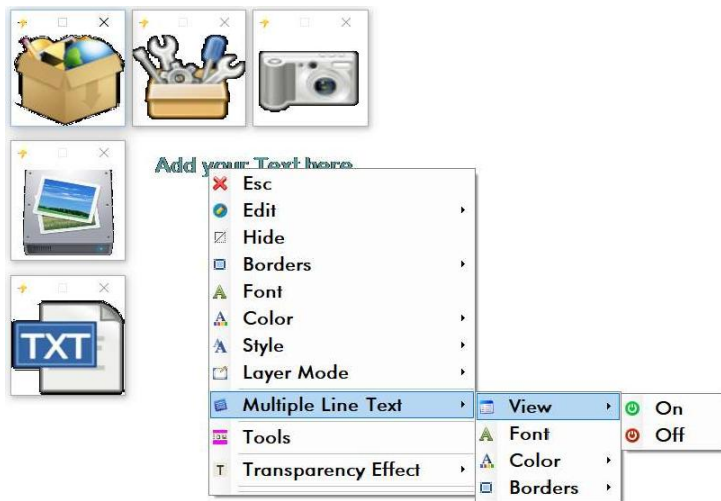

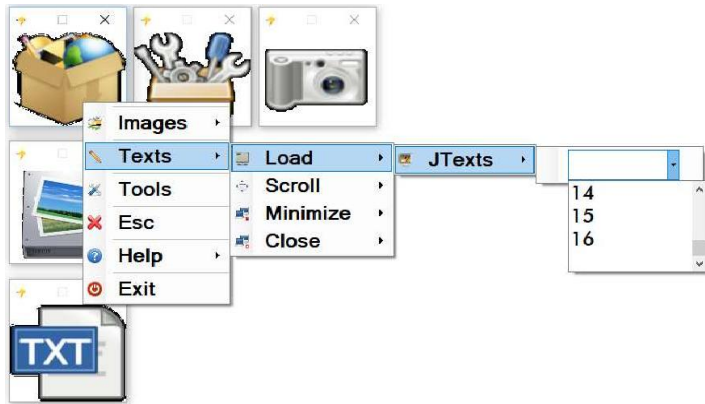

- View or Hide – To view or hide the borders.
- Rotate – Rotates your loaded Image from 90 – 350 degrees.
- Flip Image – Flips your loaded Image from 90 – 270 degrees.
- Tools – To load and view all Tools on screen.
- Transparency – To apply a background effect on the PIC.
- Close – To close to the PIC.

[TEXTS MENU]

Texts Zone

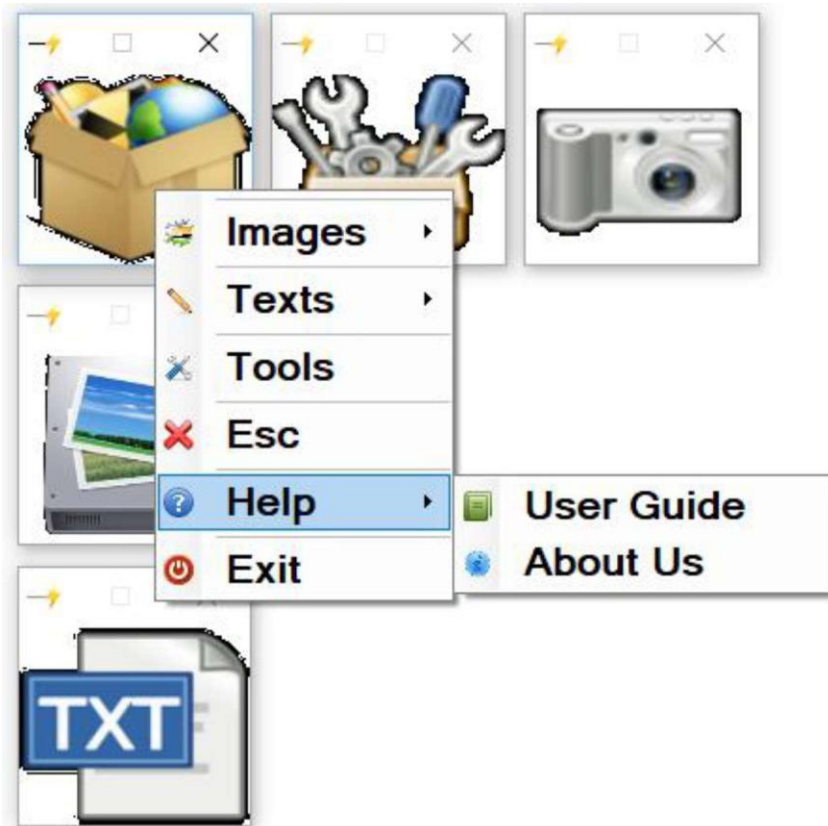

- Edit – To change the Text you want to add to your project.
- Hide – Similar to Close. (Tip: If you are going to keep using the text is better to minimize it)
- Borders – To add a border to the Text.
- Font – To change the font and size of the Text.
- Color – To change the color of the Text. (You can choose the foreground or background color)
- Style – To change the Style of the Text. (Single Line or 3D)
- Layer Mode – To individually change the foreground or background of the text.
- Tools – To load and view all Tools on the screen.
- Transparency Effect – To apply a background effect on the Text.

Multiline Texts [14, 15, 16]

- Multiple Line Text – These text inputs are designed to be switched into multiple line texts. (Rich Text Format). They are perfect when you want to add paragraphs to your project.

[USERS GUIDE]

GUIDES

- Users Guide – A simple guide to show you how to use the software.
- About Us – Our current web page and information.

[KEYBOARD SHORTCUTS]

KEYBOARD SHORTCUTS

- CNTRL & E – Escape.

- CNTRL & V – Allow Transparency Effect to the Pic.
- CNTRL & C – Make an Instant Snap Shot of your screen.
- CNTRL & F1 – Open the User Guide.
- CNTRL & Q – Exit the Software.

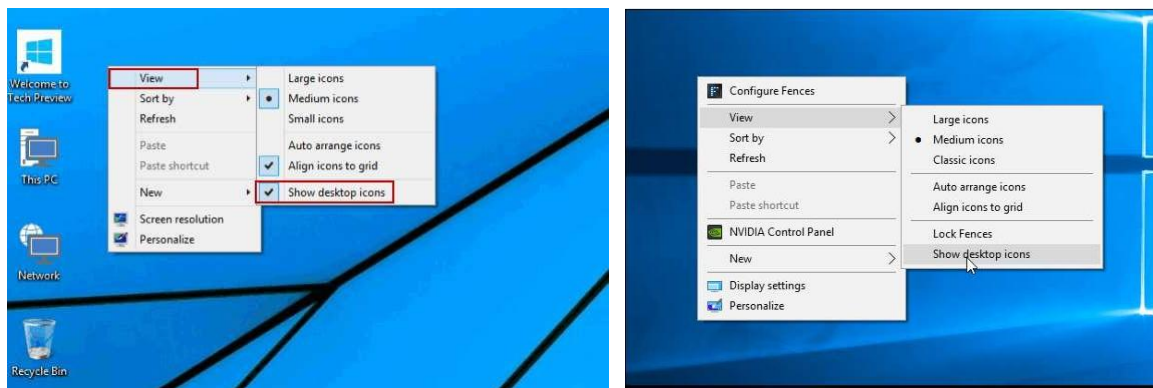

[TROUBLESHOOTING] & TIPS

TROUBLESHOOTING

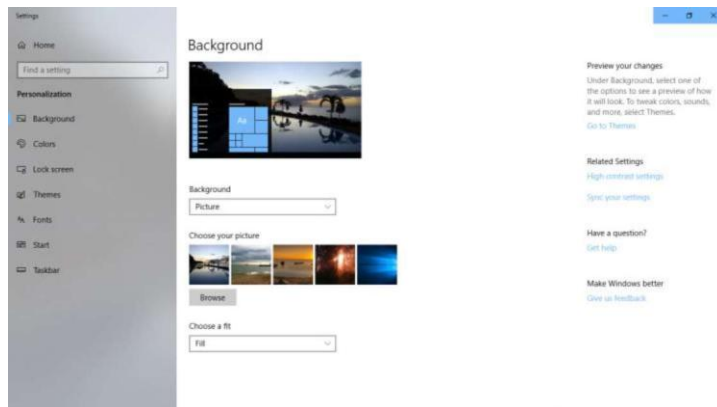

- Frozen – If freezes it could mean you have too much processes running at the same time.
- Black Backgrounds – Depending on your memory load and processor, you may see some black backgrounds while loading Pics or Text. These black backgrounds are temporary and will adjust as your memory and processor improves.
- Latency – You might get some latency while you resize your Pics or Texts. This depends on your memory load and processor. Try ending other unnecessary applications you might have open.

TIPS

- Desktop Icons – While using this software, it's better to hide your desktop icons.

- Quick Access of the Menu Options: – Using your Mouse, do a **right click** on the Pics, Texts, etc.
- Desktop Background Picture – It's better to select a desktop background Picture and use the Pics or Texts to create over it.:

- Creation Example: [Creating over a desktop Image]
